- **79%** of students reported improved **creativity**.
- **79%** of students reported that Pentathlon helped them develop **stronger character traits**.

### In the students' words:

"Academic Pentathlon has helped me realize working with others beats working by yourself. I learned things I would've learned in future grades. This has given me many benefits and has given me a head start in my education."

"I had fun learning the material with my teammates. It was hard work and a lot of material but I am so glad I joined because now I feel like I am apart of something. I loved learning all the things I learned from the material packets."

"I learned to work better with my peers, study better, and be more confident with myself."

"I liked the technology and the fact that we are getting more ready for middle school. Also, the food was good. It also helped my team-building skills."

"Overall, it was a fun experience and it's good to have it due to the fact that you can talk to people you would have never even talked to. Even if you don't win anything, you still improved on many skills, like thinking, social, and more."
