

Bird Mission!

Birds are around us virtually everywhere we go. It can be very relaxing to take a moment to observe them and listen to their song. Scientists who study birds are called ornithologists.

Steps to complete this mission:

- 1) Find an open space. This can be in a park, the wilderness, out a window or your backyard. You choose!
- 2) Find a bird to observe. Fill out the fields below with your findings.

Date:

Time:

Location:

Weather (circle one):    

What kind of bird are you observing?

What color is it? Is it big or small?

What is it doing?

Describe its behavior.

Use the space below to draw the bird.

Your mission, should you choose to accept it, is to go outside! You may be surprised at how much fun a simple focused moment in nature can be. Please share with family and friends!

Post your parks/backyard nature photos and tag them with #NatureSceneInvestigator to win prizes from Inside the Outdoors Foundation.

Photos from Orange County locations posted on Facebook, Twitter, or Instagram are eligible. Winners will be chosen quarterly.
