

Making a Nature Journal

Collect supplies (be creative):

- scissors
- paper
- a stick/popsicle stick or something similar
- cardboard (from an old box works well)
- string, rubberband, large twist tie
- hole punch if available

Put two holes in the top of your paper and cardboard. You may need help for an adult.

From the back of the cardboard, push the string/twist tie through both holes.

Tie or loop the string/twist tie around the stick.

Make a cover for your journal and get ready to record your observations in nature!
