

# Catch the Rays Vocabulary

<b>Absorbed Light</b>	Light that is soaked up by an object
<b>Crepuscular</b>	An animal that is most active around sunrise and sunset
<b>Diurnal</b>	An animal that is most active during the day
<b>Nocturnal</b>	An animal that is most active during the night
<b>Reflected Light</b>	Light that is bounced from an object in another direction
<b>Refracted Light</b>	Light that is bent and separated as it enters the surface of an object
<b>Shadow</b>	An area where light is partially or totally blocked by an object.
<b>Sun</b>	The energy source for photosynthesis and the source of light and heat for everything on Earth
<b>Translucent</b>	Something that light can pass through partially
<b>Transparent</b>	Something that light can pass through completely

Note: The focus of this program is experimenting with these science concepts, not memorizing these terms. This is done at an appropriate level for first grade.
