

# Me in My World Vocabulary

- Adaptation** A behavior or characteristic that helps a plant or animal survive in the environment
- Animal** A living thing that is not a plant.
- Biologist** A person who studies living things
- Bird** A warm-blooded, two-legged, egg-laying animal. It has a backbone, wings, and a body covered with feathers.
- Habitat** The place where a plant or animal lives that has food, water, shelter, and space
- Invertebrate** An animal that does not have a backbone
- Mammal** A warm-blooded animal that has hair and a back bone; the young feed on mother's milk.
- Reptile** A cold-blooded animal that has a backbone and a body covered with scales or horny plates
- Vertebrate** An animal that has a backbone

Note: The focus of this program is exploring these science concepts, not memorizing these terms. This is done at an appropriate level for kindergarten.
