Interconnected Systems Framework (ISF) For District Leaders
School Mental Health within a Multi-Tiered Framework

The Interconnected Systems Framework (ISF) is a structure and process to integrate mental health into your multi-tiered framework. The goal is to design a single system of support by blending resources, training, systems, data, and practices in order to improve outcomes for all children and youth. There is an emphasis on supporting staff as well as prevention, early identification, and intervention of the social, emotional, and behavioral needs of ALL students.

Cost: $1,700 per team (5 to 10 district level team members, including but not limited to: academic, behavioral, and social emotional, school-based mental health providers, and community-based mental health leaders).
