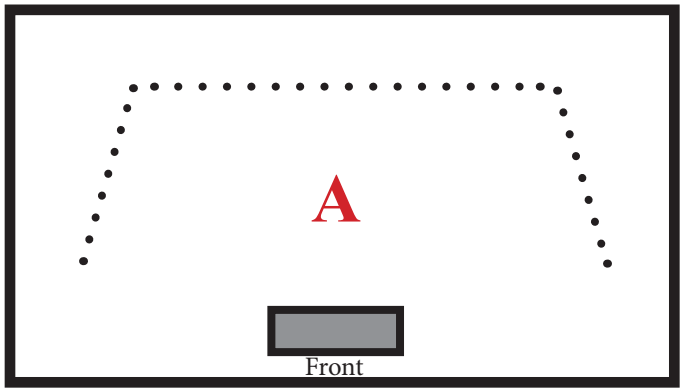
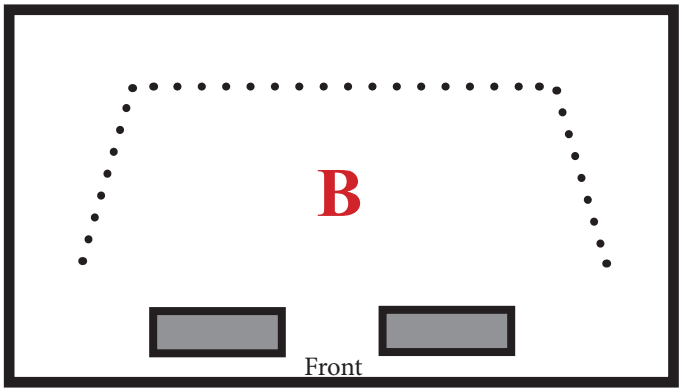
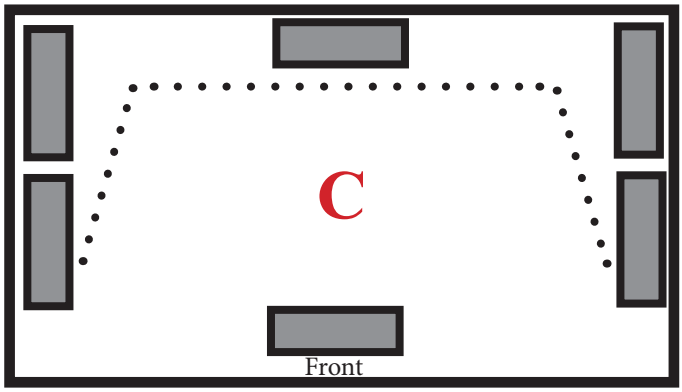
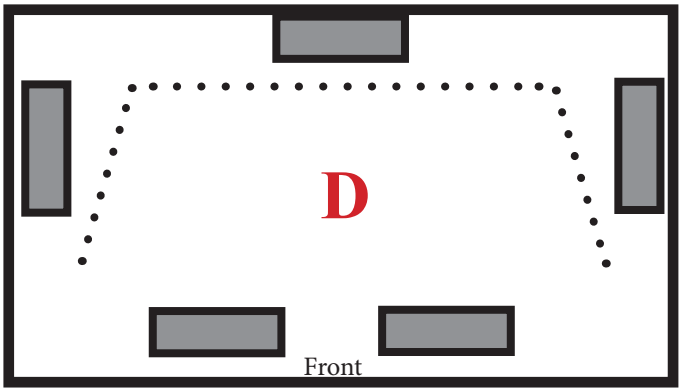
Inside the Outdoors
Traveling Scientist Room Set-Up

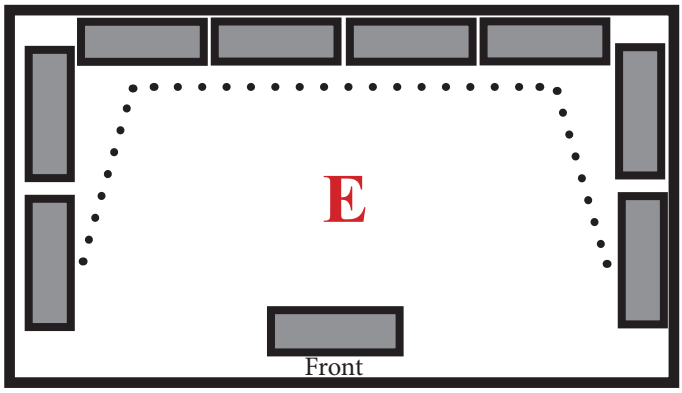
Below is the suggested set-up for our Traveling Scientist programs (not including large group assemblies). It is best to have a quiet, distraction free indoor space with plenty of room for students and hands-on stations, like a multipurpose room, science lab, library, or empty classroom. We understand that these set-up suggestions are not always available and we can be flexible. It is difficult for programs that require tables to not have desks or tables available, however modifications will be made. We appreciate your flexibility.

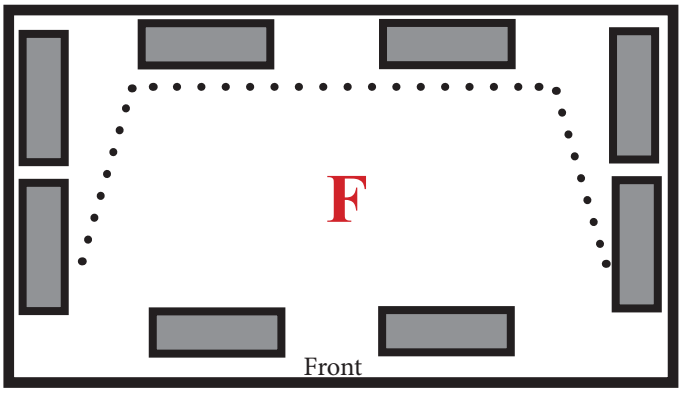












= Table

• • • • • • = Students seated on floor

Please provide a projection screen and a room suitable for a PowerPoint presentation.
